**DETAILED ACTION**

***Allowable Subject Matter***

Claims 1-3, 6-13, and 16-25 are allowed.

The following is an examiner's statement of reasons for allowance: prior art does not teach nor render obvious a circuit for transforming a singled-ended signal to a differential signal for use by an RF power amplifier suitable for transmitting signals in an RF communication system that has, in combination with other limitations, an RF input signal is coupled to the first terminal of the primary side of the transformer, and wherein a ground node is coupled to the second terminal of the primary side of the transformer, producing a differential RF signal at the first and second terminals of the secondary side of the transformer; neither does it have a method that has the step of coupling an RF ground signal to the second node on the primary side of the transformer to generate a differential RF signal at the first and second nodes on the secondary side of the transformer; nor does it have an RF power amplifier that has, the limiting amplifier further comprises a plurality of series coupled inverters; nor does it have a method that has the step of coupling the first input node to an RF signal and the second input node to a first ground potential to generate an RF signal at a first terminal of the secondary side of the transformer and a second ground potential at a second terminal of the secondary side of the transformer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
